

Order Composition of Bacterial Communities Across Different Treatment

Order Relative Abundance

Order

- Staphylococcales
- RF39
- Pseudomonadales
- Peptostreptococcales–Tissierellales
- Peptococcales
- Oscillospirales
- Micrococcales
- Lactobacillales
- Lachnospirales
- Gastranaerophilales
- Erysipelotrichales
- Enterobacterales
- Corynebacterales
- Coriobacterales
- Clostridia vadinBB60 group
- Clostridia UCG-014
- Christensenellales
- Bacteroidales
